

# DB BROWSER FOR SQLITE INSTALLATION

## INSTRUCTIONS

### Installing DB Browser for SQLite on Windows

1. Download the latest version of DB Browser for SQLite for Windows by visiting: <https://sqlitebrowser.org/> and clicking "Download".
2. Once the download is complete, double-click the .exe file to start the installation wizard.
3. Follow all instructions and prompts until the installation is complete.
4. Once installed, you can open DB Browser for SQLite from your Start menu or Desktop shortcut.

### Installing DB Browser for SQLite on Linux (Ubuntu)

1. Navigate to <https://snapcraft.io/> and search for 'sqlitebrowser'.
2. Click the 'sqlitebrowser' snap application in search results.
3. Then click on Install, and copy the installation command, for eg.  
`sudo snap install sqlitebrowser`  
and run it on the terminal window.
4. Once the installation is finished, type in "sqlitebrowser" to run the program.

### Installing DB Browser for SQLite on MacOS

1. Download the DB Browser for SQLite installer (.dmg) for MacOS by visiting the official website at <https://sqlitebrowser.org> and clicking "Download".
2. To install the software, double-click the installer file to begin the installation, then follow the on-screen instructions to complete the setup.
3. To launch DB Browser, from Finder, open the Applications folder and double-click on "DB Browser for SQLite".
